

Where Innovation fulfills Expectation

# Introducing iPoS

*“With the ever changing retail market greater expectation is now being placed on EPoS Software, at all levels from single store to multi channel. The need for reliable and flexible software with more services, better integration and low cost of ownership is for many software houses a step too far. We are pleased to have encompassed all of these expectations with the release of iPoS”*

Tony Stokes (Managing Director)

## iPoS Overview

iPoS is an innovative EPoS Application suite for both single and multi branch retailers, it brings the latest technologies together in an intuitive solution requiring minimal training. It is a browser based (thin client) system developed using Microsoft.NET programming architecture.

- 🌐 Low cost acquisitions & ownership
- 🌐 Solution is both robust and infinitely scalable
- 🌐 Installation of terminals completed within minutes without pre-configuration
- 🌐 N-Tier client Server architecture
- 🌐 Hardware level independence utilise existing hardware
- 🌐 Application served over a secure network infrastructure
- 🌐 Data stored centrally in a SQL Server Database
- 🌐 Extensive integration capability through XML Web Services
- 🌐 Local data storage and application server option available

Where Innovation fulfills Expectation

## Data Management Suite

**iPoS** is an entirely browser based solution with a number of deployment options from stand alone to fully managed ASP.

This allows all maintenance to pricing, stock and promotions etc, as well as reporting, to be performed from the office, home, or anywhere in the world that has access to the internet: providing you have the correct user access rights.

This gives you powerful real-time control over your data that will instantaneously take effect in every store.

## Delivery to the Customer

**iPoS** is quick and very simple to install. The system can be installed on site and ready to trade in under 4 minutes. It can be pre-configured to your specific requirements prior to delivery.

- Intuitive Software
- Requires minimum training
- Ability to provide full turnkey solution

## Support

- Dedicated Support Service
- All support on-line with remote access
- We perform all Back-ups
- We perform all Software Updates

## Real-Time Reporting

**iPoS** affords you real time reporting, so you can make decisions based on up to the minute information from warehouse to manager level.

**iPoS** gives you the ability to make informed decisions gaining greater control and increase Profitability.

**iPoS** has a range of standard reports that will answer most clients' needs however custom reports are available.

## Point of Sale Functionality

- Sales, Returns, Discounts, Promotions
- Vouchers & ticketing
- Special offers and multi-buys
- Multi-currency
- Colour/size matrix
- Layaways
